Secure Web Point:

http://www.securewebpoint.com/

Anonymous browsing and secure Wi-Fi connections play a major part in that goal. We provide our secure networking services to users worldwide, with a focus on keeping two steps ahead of hackers and other online criminals. Your online experience should be a safe one, and you shouldn't have to worry about ID theft, data security, and other privacy issues when surfing the web or sending emails... that's why we've made it so you can surf anonymously, with your IP address hidden away from prying eyes.

(Απλά γράψτε την ιστοσελίδα που θέλετε και σερφάρετε ανώνυμα - με άλλο ip)

- Extensions για Google Chrome και Firefox για ασφαλής σερφάρισμα: https://www.eff.org/https-everywhere
